

# Green Label Services Ltd

## PROVISION OF WASTE MANAGEMENT SERVICES AND ENSURING PUBLIC HEALTH SECURITY

**We wish to congratulate Kampala Capital City Authority for the 7 years of service and upholding the implementation of the City Management Mandate.**

As a stake holder, GLSL believes that the environment greatly contributes to the wellbeing of the ecosystem and therefore should be jealously guarded, maintained and boosted to ensure the resilient and improved livelihood for sustainable development. As we congratulate KCCA upon this big stride, we also call upon the general public as the generators of waste to be aware of the importance of waste segregation and subsequent safe temporary storage of waste. Green Label Services, a NEMA licensed company will continue to offer the preferred solutions for environmental protection and Public Health Security through safe disposal of hazardous and non-hazardous waste as per international and local standards.
