

CREATING A TRADITION OF EXCELLENCE,
COME BE PART OF IT.

celebrating FIVE YEARS of nurturing confident, independent,
self motivated learners in our region and beyond.

GEMS Cambridge International School
KAMPALA

At GEMS CIK we provide a holistic education

How time flies! It was a privilege to be part of the founding team at GEMS Cambridge International School-Kampala. It was a great honour to serve a community of loving parents and students and a strongly supportive team. I hold all the memories, effort and courage at heart but most of all commend GEMS Education for creating a true education environment for children.

regardless of your role in the school. I applaud the parent partnership that CIK has in place, it truly is unique.

It is not common in the current times to find a school that is built from scratch meant for learning, meant to nurture the lives and shape aspirations and dreams of our young ones. I am happy that Uganda has this kind of school setting the tone for all education investors on the continent. Beyond this is what actually goes on in each of the classroom. Everyone working towards a common goal and everyone in the school recognising that every little effort counts to the success of the school. Even more, choosing to conduct oneself in a way that is a true pattern or example to the children you are nurturing

It is a true commitment to continuous improvement and parental satisfaction. A new school is just like a new family, a lot is required, a lot is demanded. Yet the most important is that each year, the family and children in it continue to take steps into the right direction. I am thrilled that five years have gone by, what a milestone! May GEMS CIK continue to take even bigger steps into the right direction.
