

## Congratulations!

On the occasion of the commissioning of the 183 MW Isimba Hydropower Plant, the Electricity Regulatory Authority (ERA) takes this opportunity to appreciate the President of the Republic of Uganda, His Excellency, General Y. K. Museveni, for his unwavering commitment to decisively address electricity supply in the country. ERA congratulates the Minister of Energy and Mineral Development, the Uganda Electricity Generation Company Ltd and the entire Electricity Supply Industry on this great milestone.

The commissioning of the Isimba Hydropower Plant brings Uganda's Total Generation Installed Capacity to 1167 MW, which will support Government Policy on accelerated access to clean energy and industrialization for the country's socio-economic transformation. The overall performance of the Electricity Supply Industry from 2000 to-date is highlighted below:

### Total Installed Capacity

## HAS THE UGANDA REGULATORY SYSTEM WORKED?

### A Quick Comparison

2000	2019
• 3 Generators	• 40 Generators
• No Solar Facility	• 4 Solar Plants
• 280 MW Installed Capacity	• 1167 MW Installed Capacity
• Single Distributor (Uganda Electricity Board)	• 10 Distribution Licensees
• Approximately 180,000 Customers	• 1,352,735 Customers
• Purely Government Investments	• Government and Private investments
• Unreliable Subsidized Tariffs	• Cost-Reflective Tariffs
• Over 38% network Losses	• 16.4% Losses in 2018
