Attendance/Access

Smart Campus Card Solution

The e-Campus Solution essentially makes universities cashless. The e-Campus card is loaded with appropriate cash in various wallets in the chip within the campus for specific expenditures. The solution is to automate the campus facilities such as the library, canteen, photocopy shop, class attendance and examination using a single smart card. The solution will expand and integrate all current campus management facilities and create a seamless student service experience. The card can be extended to control access into the campus a person without the card or whose biometrics don't match the card's data is denied access.
