

# The steel that builds the nation

**F**ounded by Dr Sikander Lalani under licence of the Uganda Investment Authority (UIA),

Roofings Group launched operations in 1994 and has since not looked back.

Roofings Group offers a one-stop service and diversified product shop for the entire steel and plastic construction materials industry in East and Central Africa.

The world of Roofings Group is one without boundaries – growing, changing and challenging an environment that embraces different skills, continuous innovation, sustainable growth and a better quality of life.

"I had a dream to build something I could be proud of. Decades later, I am a part of something we can all be proud of," said chairman Lalani at the launch of Roofings Rolling Mills, Namanve.

"From the houses we live in; the schools that teach us, the farms that feed us, the bridges we cross, to the protection around our homes; we strive to deliver unparalleled quality through our value-added solutions to make your life easier.

"This is made possible by

Some of the new products displayed during Roofings' celebrations to mark 25 years in business

our commitment to a culture of continuous improvement, through which we drive operational excellence in processes, products and people.

"We care enough to ask and are courageous enough to do, this is why Roofings Group is creating solutions that meet our customers' needs for today and tomorrow.

## Roofings Limited

Launched in 1995, Roofings Limited was the anchor that helped establish the other two subsidiaries that make up the Roofings Group.

Roofings Limited is located on Plot 126 Entebbe Road, Lubowa estate, and about 6km from Kampala city. Roofings Limited mainly engages in cold forming and

produces a vast range of steel products for the construction sector. The Lubowa plant is the headquarters for the group.

## Roofings polypipes

The factory, which was commissioned in 2012, is specifically designed for the production of construction plastic pipes of various

dimensions and PVC fittings used in plumbing, drainage management and in electrical installations.

Roofings polypipes is the only construction plastic pipes industry in the country as of now and this sets Roofings Group apart from the rest as we think "a one-stop centre for all quality construction materials".

**ROOFINGS OFFERS A PRODUCT SHOP FOR THE ENTIRE STEEL AND PLASTIC BUILDING MATERIALS INDUSTRY IN EAST AND CENTRAL AFRICA**

## Roofings Rolling Mills

Roofings Rolling Mills (RRM) is one of the largest and most modern steel complexes operating in East and Central Africa. Based in the industrial park, RRM is strategically located to serve both the local Ugandan market and the markets of EAC and COMESA.

The three-unit complex consists of; Phase (i) Wire galvanising plant, Phase (ii) Hot rolling (Rebar) mill, Phase (iii) Cold rolling mill with Galvanising and colour-coating lines.
