The National Animal Genetic Resources and Data Bank is mandated to carry out comprehensive breeding programme in Uganda. NAGRC&DB has strategized to realize these goals through: (i) enhanced animal genetic improvement efforts for increased animal production and productivity (ii) Conservation biodiversity, sustainable utilization and development of indigenous animal genetic resources (iii) Strengthen institutional management capacity, growth and development (iv) Client oriented services, collaboration and entrepreneurship (v) National animal information resource and development centre established.

**Vision:** 'A leader in profitable production and efficient delivery of animal genetic resources and services in Eastern Africa'.

**Mission:** 'To establish a comprehensive and sustainable National Animal Breeding Programme which meets the commercial and developmental interests of the actors along the livestock sub-sector value chains'.

**Goals:** 'To contribute to the transformation of the agricultural sector by enhancing sustainable livestock productivity through conservation and improvement of animal genetic resources'.
