

RURAL ELECTRIFICATION AGENCY

THE PEOPLE'S ELECTRICITY LINK

The Board, Management and Staff
of Rural Electrification Agency
congratulate the NRM Government
on its 30th Anniversary.

VISION

Universal access to electricity by 2040

MISSION

Dedicated to the socio- Economic transformation
of lives of Uganda's rural communities by
extending electricity services in an equitable and
sustainable manner.

H.E YK Museveni commissions a powerline in Buliisa District.

The Rural Electrification programme has achieved extensive national coverage. To date 108 district headquarters have been electrified and the balance will be covered by 2017.

In order to scale up electricity access to Ugandans, REA has introduced a number of mechanisms to remove the barrier of high connection costs.

The first one is the Output Based Aid(OBA) mechanism which provides for subsidisation of an out put grant for household electricity connections.

The second is the revolving fund which will pre- finance consumer connections and recover the costs over a period of time.(3- 5 years).

These measures are aimed at ensuring that the national objective of achieving universal electricity access by 2040 is achieved.
